jitrajesh5@gmail.com
LinkedIn: Linkedin.com/in/jitraj-esh/

Cybersecurity and computer science student with experience in machine learning, malware analysis, and software development. Developed an ML-based malware detection system that analyzes files and generates threat risk scores. Presented research on Brain–Computer Interfaces at an international conference and led development of a disaster management application at a national hackathon. Passionate about cybersecurity research, AI-driven threat detection, and building scalable security solutions.

Education

Expected in July 2028

Bachelor of Computer Applications Cybersecurity in Computer Science
Kristu Jayanti Deemed To Be University, *Bengaluru, India*

Thesis Paper: Invasive Brain–Computer Interfaces
Conference Paper – ICCI 2026

- Analyzed neural interface architectures, signal acquisition methods, and emerging applications in healthcare and human–computer interaction.
- Discussed technical limitations, cybersecurity risks, and ethical implications of invasive neural implants.

Disaster Management Mobile Application, *Team Leader* – Capstone / Hackathon Project

- Developed a **disaster response platform** connecting volunteers with people in need during emergencies.
- Implemented an **emergency callback system** to coordinate rapid response and assistance.
- Designed features for **real-time communication, request management, and volunteer coordination**.
- Led a development team and **presented the solution at a National Hackathon**.
- Focused on **scalability, crisis response efficiency, and user accessibility**.

Expected in May 2025

High School Diploma
Aditya Academy Senior Secondary, *Kolkata, India*

Graduated with a CGPA of **8.1**

Malware Detection & Risk Scoring System, *Developer* -Capstone Project

- Built a **machine learning–based malware analysis system** to evaluate suspicious files and generate a **malware risk score**.
- Implemented automated **file behavior analysis and feature extraction** to detect potential threats.
- Generated a **detailed security summary report** highlighting risk level, indicators of compromise, and threat classification.
- Applied **machine learning algorithms for malware classification and anomaly detection**.
- Focused on **cybersecurity automation, threat intelligence, and malware detection accuracy**.

Skills

- Python Programming
- Data Structures & Algorithms
- Research & Problem Solving
- Data analysis
- Machine Learning
- Statistical Data Analysis
- Project Support

Experience

January 2025 - January 2025

Business Development Intern *Child Cancer Trust, Remote*

- Conducted **outreach to potential donors and partners**, supporting fundraising initiatives for children's cancer treatment programs.
- Assisted in **organizing awareness campaigns and fundraising activities**, improving community engagement.
- Collaborated with team members to **create outreach materials and sales presentations** for donor engagement.
- Maintained **donor records and campaign data** to support reporting and tracking of fundraising progress.

August 2025 - Current

Student Volunteer *Kristu Jayanti College, Autonomous, Bengaluru, India*

- Assisted in organizing **Oracle Tech Summit and University Technology Fest**, supporting event coordination and logistics.
- Managed **attendance tracking and participant records for 1,500+ students per event**, ensuring accurate data management.
- Coordinated with organizing teams to **streamline registration, entry management, and attendee flow** during technical sessions.
- Supported **event operations, technical sessions, and participant assistance** to ensure smooth execution of university tech events.

Personal Details

Date of Birth: 11/04/2007 **Nationality:** Indian

Gender: Male

Certifications

- **Cisco Networking Academy – Introduction to Cybersecurity** (2026) – Completed foundational training on cyber threats, online safety, vulnerabilities, and security practices.
- **Cisco Networking Academy – Cybersecurity Essentials** (2026) – Gained knowledge of network security, threat mitigation, vulnerability assessment, and incident response fundamentals.
- **NIIT Foundation – Cyber Suraksha Pulse Program (Cybersecurity Essentials)** (2026) – Participated in cybersecurity awareness and security fundamentals training program.
- **International Conference on Computational Intelligence (ICCI) – Research Presentation** (2026) – Presented research paper *"Invasive Brain–Computer Interfaces: Advancements, Challenges, and Societal Considerations."*
- **Replit Vibehackathon – Certificate of Participation** – Completed a 36-hour coding hackathon focused on collaborative software development and rapid prototyping.
- **RIFT '26 Hackathon – Unstop Freedom Festival** – Participated in a competitive hackathon organized by Physics Wallah Institute of Innovation
- **IBM – Cybersecurity Analyst Professional Certificate** – Training in security operations, threat detection, incident response, SIEM concepts, and vulnerability management.
- **Google – Professional Cybersecurity Certificate** – Training in security foundations, threat detection, incident response, network security, Linux, SQL, and use of SIEM tools for security operations.
